

Project Info

@Kailun Zhang

About

Welcome to our project's Confluence page, where our team of six software developers is commissioned to work on a physiotherapy AI chatbot.

This tool is not only for patients with osteoarthritis seeking answers and support but also serves as a valuable resource for researchers interested in analysing patient inquiries and for visitors who are looking to learn more about the condition, whether to prevent it or to help others.

Here, you'll find all the documents about our project, updates, ideas and feedback.

Our mission is to achieve better basic management of osteoarthritis by enhance access to information and support, additionally, providing insights to the ones who desires understanding of the condition.

Team Composition

"Grandpa of three cats"
